NOTES

Touch screen sensor will cease to work and should not be used while in contact with water. Water or grease on the watch surface will effect the function of the touch screen sensor. Please wipe screen before use.

When the low battery indicator is displayed:
Touch screen function will be disabled
Text function will be turned off
Button B will become the character scroll button instead of touch screen adjustment.
Button A will become the confirm/advance button.

To change settings in low battery mode
When entering setting mode by pressing button A, Press button B to sole Characters
Press button A to confirm and move to the next item.

MORE NOTES

Press Button B to activate module, time will be displayed. The touch screen feature (TSF) will now be enabled, to allow menu scrolling and setting adjustment. The TSF will automatically switch off when left idle for over one minute.

Recommended time for displaying LED should not exceed one minute. The low battery signal will be displayed as a warning, even when battery is full, if LED/TSF is continuously used for a long period. The low battery signal will disappear after the LED is left idle for a few hours.
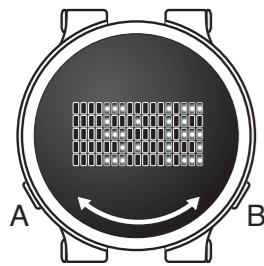

Watch functions best between temps. 10°c-40°c

Battery life will depend on the usage.
Change battery as soon as possible when LOW battery indicator is always on.

STORM
